The easy way to ensure infection control best practices at the point of care

Enhance safety and clinical efficiency with SwabSleeve, SwabCap's protective and dispensing, packaging, giving you easier access to infection control technology at the point of care.^{1,2}

SwabSleeve offers unique protective and dispensing packaging for sterile packed SwabCaps, and has been designed to meet your infection control needs across all areas. The transparent SwabSleeve hangs securely from an IV pole, providing clinicians with easier access to SwabCap while maintaining your infection control best practices.

Unlike strips, which expose disinfecting caps to potential contamination, the SwabSleeve packaging provides better sterility by:

Eliminating Touch Contamination

Allowing for Easier Cap Dispensing

Allowing Visibility from All Angles

For more information on SwabSleeve, contact your local ICU Medical SwabCap product representative.

Order Number	Quantity Case	Quantity per sleeve
