Commitment to achieving Net Zero

Smith's Medical International Ltd. is committed to achieving Net Zero emissions by 2050 within the United Kingdom.

Baseline Year: 2022	
Additional Details:	

Smiths Medical International Ltd. updated its emissions reporting to Greenhouse Gas Protocol Corporate Accounting and Reporting Standard (GHG Protocol) within 2023. As a result, emissions reported within our initial Carbon Reduction Plan have been updated accordingly. We enhanced our emissions reporting tools within 2023 which resulted in improved Scope 3 emissions reporting. Downstream Transportation and Distribution emissions have been calculated and incorporated in our 2022 Baseline Year emissions and compared to our 2023 performance. Emissions related to Upstream Transportation and Distribution activities is required to fully characterize our Scope 3 emission footprint. This work is targeted for completion within 2024.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)					
Scope 1	29.2					
Scope 2	173					
Scope 3	5,094*					
	Our Scope 3 emissions breakdown is as follows:					
	Employee Commuting	8.41				
	Business Travel	74.7				
	Waste Generated in Operations	1.07				
	Upstream Transportation & Distribution*	NA				
	Downstream Transportation & Distribution	5,010				
Total Emissions	5,296* tCO2e					

Current Emissions Reporting

Smiths Medical International Limited experienced a significant reduction in Scope 1 and 2 emissions through execution of strategic projects within 2023. Scope 3 emissions related to travel experienced an increase due to deceases in COVID-19 travel restrictions in countries in which we operate. Emissions related to waste generation were due to increases in select product volumes and amendments to final waste management. Improved Transportation and Distribution emissions were due to reduced parcel volumes.

Reporting Year: 2	023				
EMISSIONS	TOTAL (tCO ₂ e)				
Scope 1	18.3				
Scope 2	133				
Scope 3	2,908*				
(Included Sources)	Employee Commuting	6.71			
	Business Travel	76.0			
	Waste Generated in Operations	6.60			
	Upstream Transportation & Distribution*	NA			
	Downstream Transportation & Distribution	2,819			
Total Emissions	3,060* tCO2e				

^{*}Reporting year 2023 does not include Upstream Transportation and Distribution emissions.

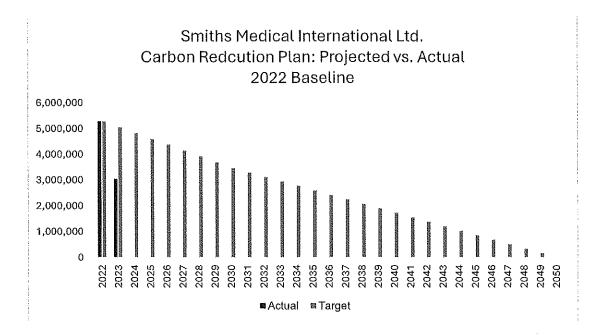

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon Scope 1 and 2 emissions will decrease by 35% by 2030. Strategies to reach this goal include:

- Execute internal Environmental Management System policies.
- Deploy Environmental, Health and Safety Management Information System across the global enterprise.

- Implement manufacturing efficiency improvements.
- Consolidate administrative functions.

To achieve our decarbonization goals, we will pursue continuous improvement targets through a multi-year strategy supported by our Environmental Management System.

De-carbonization emphasis areas:

- Improved Waste Management Processes.
- Increase energy efficiency.
- Increase use of clean energy.
- Partner with Supply Chain matrix to reduce Scope 3 emissions.
- Establish environmental performance purchasing criteria with suppliers.
- Execute internal improvements in shipment density.
- Evaluate use of new technologies within the Supply Chain to drive efficiencies.
- Execute product design improvements that reduces packaging.

Declaration and Sign Off

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
