A complete line of needlefree IV connectors and sets to help you meet your clinical needs.

Home Infusion Connectors & Sets

Needlefree technology that eliminates clamping confusion and risk of error.
IV connectors and sets that eliminate clamp confusion while helping you improve safety practices and patient care.

In home infusion, connectors that require a specific clamping sequence before or after disconnection of a luer can cause confusion and increase mistakes.

Our IV sets, featuring needlefree connectors with neutral displacement technology, can help eliminate the education burden and risk of mistakes, since no specific clamping sequence is required.

Design features common to each of our connectors have been proven to provide an effective microbial barrier against bacteria transfer, helping you to decrease the chance of catheter-related bloodstream infections (CRBSIs)."

**Description:** MicroClave® Connector

**Description:** Neutron™ Catheter Patency Device

**Description:** Antimicrobial MicroClave® Connector

**Description:** 7” (18 cm) Smallbore Ext w/Remv Needlefree Connector, Clamp, Rotating Luer, Non-DEHP Tubing

**Description:** 6” (15 cm) Non-DEHP Smallbore Ext Set w/Clamp, Rotating Luer

**Description:** 14” (36 cm) Smallbore Ext Set w/Needlefree Connector, Clamp, Rotating Luer, Non-DEHP Tubing

**Description:** 14” (36 cm) Smallbore Ext Set w/Clamp, Rotating Luer, Non-DEHP Tubing

**Description:** 19” (48 cm) Ext Set w/Easydrop® Flow Controller, Clave®, Clamp, Rotating Luer, Non-DEHP Tubing
