

# SwabCap<sup>®</sup>

## Compliance Assessment Program (CAP)

A commitment to clinical support and education to help ensure the effective implementation of SwabCap Disinfecting Caps for Needlefree Connectors.

---

We know that implementing a new product into clinical practice requires time and effort to train staff and ensure compliance. That's why we developed the CAP program to help you maximize product performance and patient safety through on-site training and education, compliance monitoring, and detailed reporting.

### Education and Training

Get hands-on product training from our team of experienced clinical specialists. These specialists work closely with your facility to understand existing protocols and help your teams effectively integrate SwabCap into practice.

### Compliance Monitoring

Our clinical support team will consistently monitor SwabCap utilization and compliance with on-site audits. We will also provide you with the tools you need to document compliance if you choose to monitor independently.

### Reporting and Analysis

Compliance monitoring checks are followed up with detailed reports and analytics to help you identify gaps in compliance and target areas that may require additional training and support.

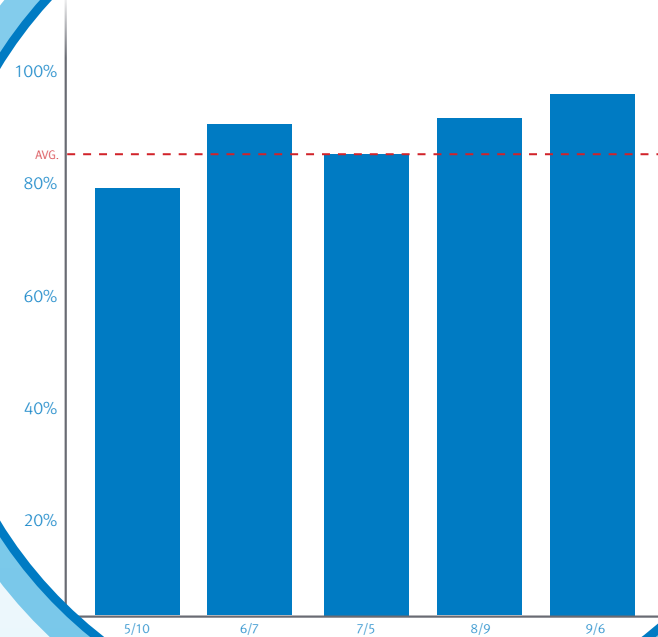

[See reverse side for reporting details](#)

# Increase SwabCap Compliance by Monitoring Hospital-Wide Usage Reports

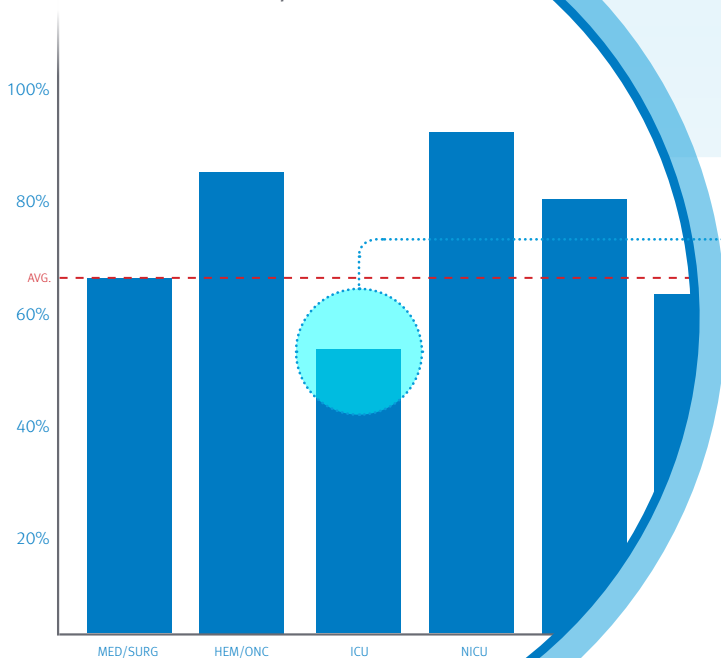

ICU Medical's CAP program allows you to monitor trends in overall SwabCap utilization and maximize compliance to disinfection protocols.

- › Easily monitor compliance trends
- › Set compliance goals and track progress

### Hospital-Wide Compliance

### Unit Compliance

## Identify and Educate Specific Units Not Meeting SwabCap Compliance Targets

Unit-by-unit reporting tools allow you to identify departments that may need additional training and education.

- › Compare individual units to hospital-wide averages
- › Get a complete snapshot of SwabCap compliance

For more information about the CAP program, contact your local ICU Medical representative or visit [www.icumed.com/swabcap](http://www.icumed.com/swabcap).
