Commitment to achieving Net Zero

Smith's Medical International Ltd. is committed to achieving Net Zero emissions by 2050 within the United Kingdom.

Baseline Year: 2022	
Additional Details:	
Smiths Medical International Ltd. Is proud to provide its initial Carbon Reduction Plan. Our plan was developed after an exhaustive review of our Scope 1 and 2 emissions. *Due to numerous organizational changes as part of the acquisition of Smiths Medical International by ICU Medical within 2022 our Scope 3 emission reporting does not include all five required subsets currently. The subsets requiring further analysis include Upstream/Downstream transportation and distribution. Scope 3 emissions calculated to date are provided below. We are currently working to address this gap within 2023 and will update our Carbon Reduction Plan when complete.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	13.2
Scope 2	78.2
Scope 3	149.7* Our Scope 3 emissions breakdown is as follows: <i>Employee Commuting</i> 3.83 <i>Business Travel</i> 145.6 <i>Waste Generated in Operations</i> 0.23
Total Emissions	241.1*

Current Emissions Reporting

Note: Since our baseline performance is measured against Calendar Year 2022, current reporting year emissions provide annual emission reduction targets versus YTD actual emissions.

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	11.9 (10% reduction Target)
Scope 2	74.3 (5% Reduction Target)
Scope 3 (Included Sources)	148.3* (1% Reduction)
Total Emissions	234.5*

* 2023 emission targets do not include Upstream/Downstream transportation and distribution Scope 3 emissions as they are being defined currently.

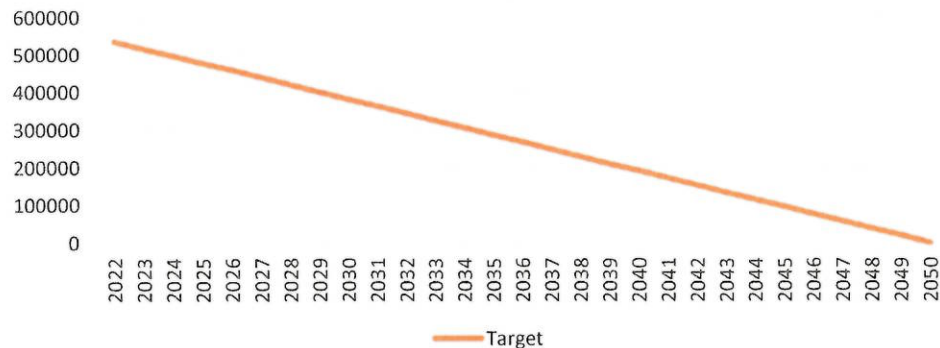

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon Scope 1 and 2 emissions will decrease by 35% by 2030. Strategies to reach this goal include:

- Execute internal Environmental Management System policies.
- Implement manufacturing efficiency improvements.
- Consolidate administrative functions.

Smiths Medical International Ltd.
Carbon Reduction Plan: Projected vs. Actual
(2022 Baseline)

To achieve our decarbonization goals, we will pursue continuous improvement targets through a multi-year strategy supported by our Environmental Management System.

De-carbonization emphasis areas:

- Improved Waste Management Processes.
- Increase energy efficiency.
- Increase use of clean energy.
- Partner with Supply Chain matrix to reduce Scope 3 emissions.
- Establish environmental performance purchasing criteria with suppliers.
- Execute internal improvements in shipment density.
- Evaluate use of new technologies within the Supply Chain to drive efficiencies.
- Execute product design improvements that reduces packaging.

Declaration and Sign Off

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Brian M. Bonnell
