Fast and Convenient Fluid Compounding Technology

With the PharmAssist™ Pro peristaltic pump, transferring large volumes of diluents, preparing admixtures, and reconstituting drug vials just got easier. A user-friendly, easy-to-read colour touch screen lets you enter preparation data more efficiently while a powerful motor helps streamline pharmacy operations and maximise the speed and accuracy of transfers.

Increase throughput during the batching process and improve the efficiency of your pharmacy's sterile compounding workflows.

Efficient fluid transfer technology right at your fingertips

Enhance your pharmacy's fluid transfer process with a user-friendly interface, intuitive preprogrammed prompts, and automatic interval settings.

Easy to Use

Simple interface with colour touch screen and intuitive preprogrammed prompts allow for easy programming and operation.

Active Air Removal

Specialised modes designed to evacuate residual air from ambulatory cassettes, IV bags, and other challenging containers.

Enhance Efficiency

Gravimetrically guided workflows ensure technicians are preparing transfers in the most time-efficient and accurate way.

Exportable Compounding Logs

Passively documents all preparations and device calibrations so you can easily export all your records in the event of an audit.

Colour Touch Screen

Enter information more efficiently and accurately with an easy-to-read touch screen.

Syringe Access

Securely connect to syringes and increase throughput and efficiency by batch-filling.

In-line Quality Control

Receive quality check prompts and reporting to help ensure batch preparations maintain accuracy throughout the process.

Ambulatory Cassette Filling

PharmAssist Pro's motor allows for various speed settings used to fill elastomeric or ambulatory pumps or transfer viscous fluids.

Improve the efficiency of your batch-filling process

Whether it's large-volume transfers or batching syringes, PharmAssist Pro Peristaltic Pump has everything you need to enhance the efficiency of your high-volume compounding.

The PharmAssist Pro system is not intended to screen, monitor, treat, diagnose, or prevent any specific condition or disease.

The product complies with current legislation and has the corresponding CE marking. For additional information, warnings and / or safety precautions, refer to the Instructions for Use.
