

Gripper Plus™ Power P.A.C.

Port Access Needle

Safety Huber Needle

- › A safety port access needle to administer or withdraw fluids from implanted ports
- › Available in different sizes and lengths
- › Safety mechanism to be activated when removing the needle — audible click and visible engagement confirm that the safety arm is activated into lock position
- › Thick cushioned needle platform sits against the skin when in-situ
- › Non-siliconized, non-coring needle
- › The 20 cm-long extension set is available with or without Y-site with luer-activated needleless injection site
- › Extension set with blue tubing differentiates from non-power needles
- › Color-coded clamp(s)
- › Priming volume 0.3 mL or 0.8 mL depending on the extension set with or without the Y-site version
- › 19G and 20G power injection up to 5 mL/sec and pressure up to 300 psi
- › 22G power injection up to 2 mL/sec and pressure up to 300 psi
- › Positive ANTT® evaluation
