Commitment to achieving Net Zero

ICU Medical International Ltd (formerly Smith's Medical International Ltd.) is committed to achieving Net Zero emissions by 2050 within the United Kingdom.

Baseline Year: 2022	
Additional Detail:	
Baseline 2022 Employee Commuting calculations have been updated by utilizing a more consistent emission factor which has increased our baseline emission values previously reported. Emissions related to Upstream Transportation and Distribution activities are required to fully characterize our Scope 3 emission footprint. This work is targeted for completion within 2025.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	29.2
Scope 2	173
Scope 3	5,210* Our Scope 3 emissions breakdown is as follows: <i>Employee Commuting</i> 124.4** <i>Business Travel</i> 74.7 <i>Waste Generated in Operations</i> 1.07 <i>Upstream Transportation & Distribution*</i> NA <i>Downstream Transportation & Distribution</i> 5,010
Total Emissions	5,412* tCO₂e

*2022 Baseline Emissions do not include Upstream/Downstream Scope 3 emissions.

** Calculation revised with new emission factor.

Current Emissions Reporting

ICU Medical International Ltd. formally updated its operating entity within the United Kingdom within 2024 to reflect the acquisition of Smiths Medical International Ltd. by ICU Medical, Inc. within 2022. Within 2024 we achieved a significant reduction of Scope 1 and 2 emissions through execution of strategic projects which resulted in achieving our 2030 target of a 35% reduction of Scope 1 and 2 emissions a full five years ahead of schedule. Scope 3 emissions related to waste generation were also correspondingly lower within 2024 as well. Business travel emissions experienced a significant increase due to the cessation of COVID related travel restrictions within 2024 and travel related to the execution of strategic projects within the region. Emissions reporting related to Downstream Transportation and Distribution activities are delayed at this time due to interruptions in obtaining this information from associated third parties. This information is targeted for publication within Q3 2025.

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.0
Scope 2	78.3
Scope 3 (Included Sources)	1,025*, ** <i>Employee Commuting</i> 48.0 <i>Business Travel</i> 977.1 <i>Waste Generated in Operations</i> 0.06 <i>Upstream Transportation & Distribution*</i> NA <i>Downstream Transportation & Distribution** Target Q3 2025</i>
Total Emissions	1,103 *, ** tCO₂e

* Reporting year 2024 does not include Upstream Transportation and Distribution emissions.

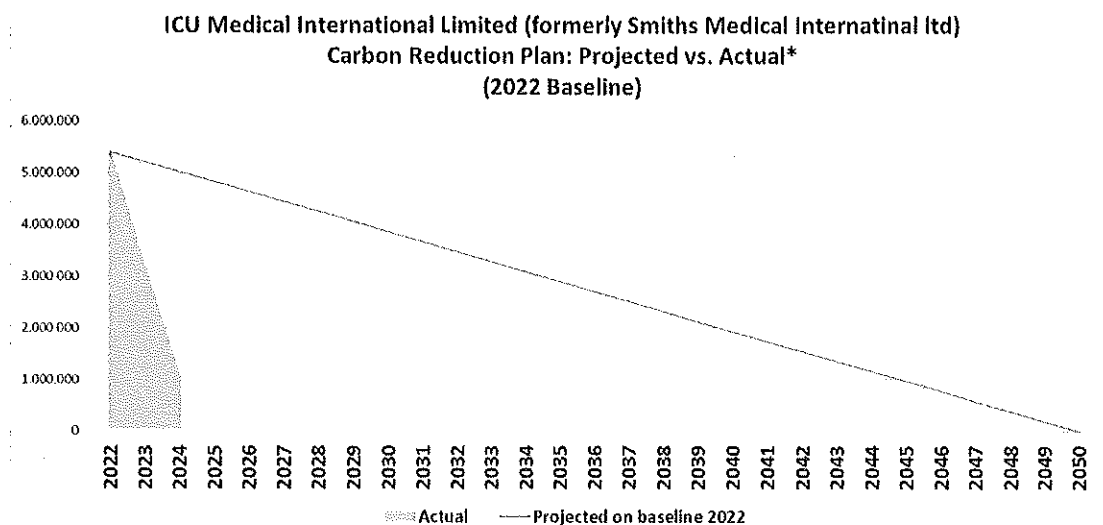

** Downstream Transportation and Distribution emissions are not provided at this time and are targeted for publication in Q3 2025.

Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that Scope 1 and scope 2 emission will decrease by 65% by 2035 based on the 2022 baseline. Strategies to reach this goal include:

- Deploy ESG emission tracking technology across the enterprise.
- Execute internal Environmental Management System policies.
- Implement energy management improvements.

To achieve our decarbonization goals, we will pursue continuous improvement targets through a multi-year strategy supported by our Environmental Management System.

De-carbonization emphasis areas:

- Improved Waste Management Processes.
- Increase energy efficiency.
- Increase use of clean energy.
- Partner with Supply Chain matrix to reduce Scope 3 emissions.
- Establish environmental performance purchasing criteria with suppliers.
- Execute internal improvements in shipment density.
- Evaluate use of new technologies within the Supply Chain to drive efficiencies.
- Execute product design improvements that reduces packaging.

Declaration and Sign Off

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Brian M. Baur
