

We see you balancing bedside safety, evolving DEHP guidance, and supply continuity.

Our IV Solutions* DEHP plan is designed to meet you there.

Grounded in evidence, guided by our materials philosophy, and focused on helping you meet 2030 and 2035 requirements without compromising care.

What we offer today

A broad, FDA-approved IV therapy portfolio

- › Extensive PVC-based options with and without DEHP across both IV solutions containers and IV administration sets to meet diverse clinical needs.
- › A predominantly non-DEHP tubing portfolio: Approximately 99% of our IV tubing sets are manufactured from non-DEHP PVC, giving you immediate options to reduce DEHP exposure in line access and infusion workflows.

This means you can begin standardizing toward lower-DEHP practice now, even as longer-term container transitions progress.

How we choose materials

ICU Medical's materials decisions—PVC, plasticizers, and alternatives—are guided by three principles: patient safety and clinical performance first, evidence over assumptions, and a balanced view of chemistry, device performance, supply reliability, and end-of-life impact to avoid regrettable substitutions.

Our commitment on DEHP and 2030 and 2035 legislation

ICU Medical will transition its US IV solutions containers and associated IV administration sets to non-DEHP alternatives and be compliant with applicable 2030 and 2035 DEHP legislation.

As we move toward 2030 and 2035, we will:

- › Expand non-DEHP IV options across the portfolio.
- › Sequence transitions to protect supply and minimize disruption.
- › Provide product mapping, materials data, and guidance to support your compliance planning.

What this means for you

- › **Smart standardization** around ICU Medical's non-DEHP IV solutions containers and IV sets with the confidence that you will be aligned with applicable 2030 and 2035 DEHP legislation.
- › **Support for change**, with clinical and operational collaboration plus clear, data-driven information on materials, exposure, and performance to help you make informed decisions for your patients and your organization.

*IV Solutions are manufactured by Otsuka ICU Medical LLC and distributed by ICU Medical Sales, Inc. unless otherwise noted.
