

# LifeShield™

## Infusion Safety Software

Bring Teams Together for Safer,  
Streamlined, and Synchronized Care

# Unite medication management in a single platform, removing barriers and streamlining collaboration to amplify the impact of every role.

## For Pharmacists

### Comprehensive Medication Management

- › Update medications, rulesets, and drug libraries quickly and easily across multiple facilities with streamlined workflows.
- › Access near real-time infusion data to uncover insights, drive safety improvements, and ensure protocols are always precise.
- › Simplify and streamline drug library review with a change summary report that clearly shows modifications.
- › The cloud environment allows for rapid, frequent, and hands-free drug library updates.

## For Nurses

### Simplified Safety at the Bedside

- › Reduce errors and spend less time programming with pre-populated doses, rates, and durations.
- › Rely on real-time safety alerts and seamless updates to help deliver uninterrupted, patient-focused care with confidence.
- › Get DERS guidance with depth, like being alerted when a medication is increased or decreased by a certain percentage—even within soft and hard limits.
- › Enable and deliver bolus doses, even throughout a running infusion.

## For Biomedical Teams

### Seamless Fleet Management

- › See your entire fleet on a single screen with a centralized platform to manage, troubleshoot, and optimize your entire device fleet.
- › Push drug library and software updates wirelessly, keeping every device ready without disrupting patient care.
- › Stay up to date with the latest version of LifeShield—always available and included with your subscription.

## For IT Teams

### Control and Security Made Simple

- › Manage security, storage, and user accounts in one place, saving time and reducing the burden on your team.
- › Protect your system with industry-standard cybersecurity, including FDA clearance, HITRUST certification, independent third-party testing, and ongoing vigilance.

## All-inclusive software package, maintenance, and support

With LifeShield software, there are no hidden fees or surprises. Everything is included—comprehensive cloud-based software, clinical training, and implementation support—without extra hardware costs or implementation fees.
